Important! Always backup your information and data first before installing any programs.

Installation

(Please read through the entire document before installing)

Please follow the step-by-step guide, DO NOT skip any part.

Copy the file '*PhoneBAK-FULL.jad'* and '*PhoneBAK-FULL.jar* to the memory stick via card reader and insert it back into your phone. *It is important to copy the files via the card reader to the memory card and not via Bluetooth.*

Click onto the file '**PhoneBAK-FULL.JAD***' to install the program. **Do not click the wrong file!**

- Install the program in '**Applications**'.
- Once installed, activate the program by clicking **'PhoneBAK SE'** .
- Scroll down and select '**Settings**' to setup.

Setting Up (On your phone)

- Enter the default Password* '**1234**'. (It will display 'Protected by BAK2u')

Send 1: 91234567 (local number)
Send 2: 6591234567 (overseas or local number with country code. Do not include '+')

Do not include '+' in front of the country code as it is embedded to the program.

*DO NOT PLACE YOUR OWN MOBILE PHONE NUMBER!

- Data Eraser
-
PhoneBAK SE includes a 'eraser' feature, where it will delete all removable files, photos, videos, folders from the internal and phone memory storage card.

*USE IT CAREFULLY!

- Always remember to save all settings before exit.

To save, select '**More / Save**'.
To exit, select '**More / Exit**'.

Final Step

- On your phone, go to '**Applications**' (Via File Manager) and activate the program in '**PhoneBAK SE / PhoneBAK**'.

The program will ask you for permission to start automatically . Click '**Yes**'.

Testings (SMS will be sent out)

Enter **ANY WRONG PASSWORD** (Example: 4321) and click '**Ok**'.

It will display '**Allow application to start automatically'** & **'Allow application to receive messages?**' Click '**Yes**' for all.

Wait for 10 seconds as the program self-configure itself.
After that it will bring you back to the main '**Applications**' page.

On actual use, a password dialogue will pop up after 60 seconds requesting the correct password to be entered, otherwise SMS alerts will be sent out. After entering the password, wait for another 20 seconds for it to process.

- Click '**More**' to give Permissions:

Messaging (To allow SMS text alerts to be sent out)

Select **'Permissions'**.
Select **'Messaging'**.
Select **'Never ask'** and press '**OK'**.

Autostart (To allow PhoneBAK SE to start when phones is powered up)

Select **'Autostart'** or **'Automatic start'**.
Select **'Never ask'** and press OK. (if you do not see this option, you may have improperly installed the program)

File Read (To allow PhoneBAK SE to auto run on the background)
Select **'File Read'** or **'Read user data'**.
Select **'Never ask'** and press OK.

Select **'File Write'** or **'Write user data'**.
Select **'Never ask'** and press OK.

- Restart the phone.

Registration

Before registration, ensure that you have the following information first:

- Activation PIN
Each copy of the software comes with an unique Activation PIN (can only be used once).

- IMEI Number*
You will need to enter your mobile phone IMEI Number* to generate the 'Unlock Key' on the webpage.

Enter your IMEI without any '-' (dashes)
For example,
Enter 1234567891011 and NOT 123-456-789-101-1

The IMEI number can be displayed on most phones by dialing the code *#06#

Step 1:
http://www.bak2u.com/activate.php
Select **'PhoneBAK SE'**

Or to go directly:
http://www.bak2u.com/activatePhonebak2.php

Step 2:
Enter the required information into the form provided, including IMEI Number and the Activation Pin provided during your purchase.

Under **'Operating System'**, select **'Sony Ericsson'**

Click 'Activate' button. Unlock Key will be generated (Keep a copy of the key for your future reference, BAK2u do not keep a copy due to security reason.)
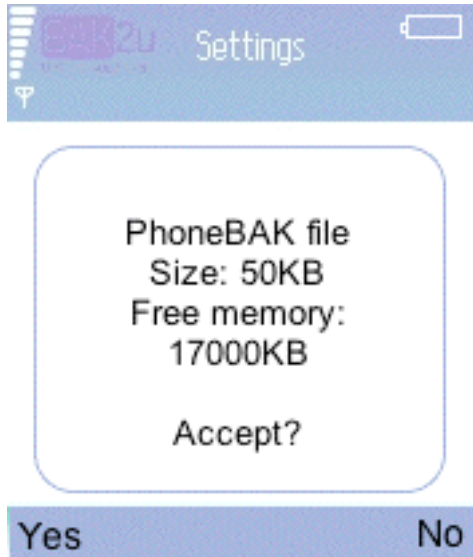

Step 3:
Enter the 'Unlock Key into the anti-theft software PhoneBAK SE in **your phone** (Application / PhoneBAK SE / Settings).

Press 'More / Register' and enter the Unlock Key.
Remember to save before exit.
